

## eSHUTTLE™

### COMPREHENSIVE GOVERNANCE, RISK, AND COMPLIANCE FOR WINSHUTTLE PRODUCTS

Governance, Risk and Compliance (GRC) best practices require complete traceability of all data entry into SAP® as well as any data downloads from SAP. Winshuttle's eSHUTTLE provides centralized visibility and governance for enterprise deployments of Winshuttle solutions. This not only enables companies to share files and best practices across the organization, but also addresses the specific controls and audit trail requirements to meet SOX and corporate governance policies.

eSHUTTLE delivers the controls, security and traceability that enable enterprises to deploy Winshuttle's data solutions, such as transactionSHUTTLE, querySHUTTLE, and runSHUTTLE across the organization. In addition to using the standard SAP controls, security profiles and audit trails, eSHUTTLE provides added controls and auditing for the interaction of Winshuttle's products with the SAP Business Suite. eSHUTTLE provides this functionality using the Microsoft SharePoint framework, providing native integration to Microsoft technologies including Active Directory, Excel, and Access. eSHUTTLE offers the ideal integration and control point between the Winshuttle, SAP, and Microsoft product families.

“Data is a critical asset and is considered as valuable a resource as employees and products. eSHUTTLE enables companies to properly implement an enterprise data management effort.”

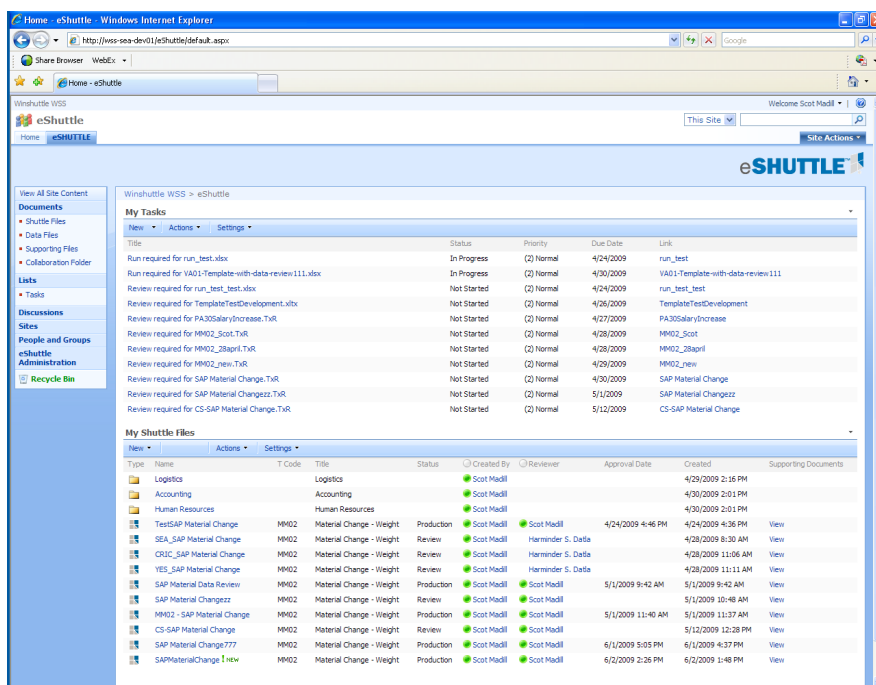

- Erin Stone, SAP FI/CO Senior Analyst at B. Braun Medical Inc.

#### Key Features of eSHUTTLE:

- Centralized administration of Winshuttle users and licenses
- File sharing and collaboration
- Activity dashboard and centralized reporting
- Version control and workflow management
- Native Microsoft Office and SharePoint integration

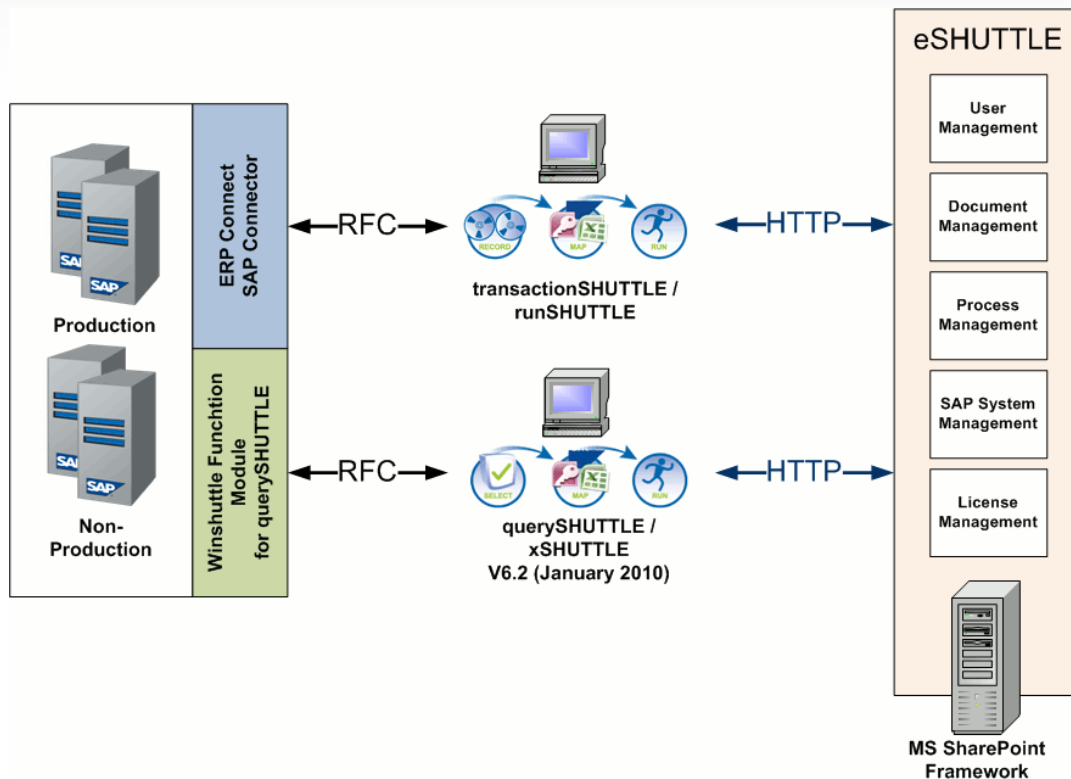

#### Key Benefits of eSHUTTLE:

- Lets IT easily control Winshuttle user access to the SAP environment
- Centralized repository for SHUTTLE, query, and data files promotes best practices
- Provides full traceability and ROI analysis through comprehensive logging of records uploaded and total time saved by the user
- Adds governance to all Winshuttle-based processes as all files can be reviewed and approved before being used in a production environment
- Works with IT systems already in place in most organizations

**Winshuttle, Inc.** is the leading provider of data entry and data download tools for SAP users worldwide. Winshuttle's products, transactionSHUTTLE and querySHUTTLE, replace manual data input and complex technical tools by easily and securely shuttling data between Microsoft Excel or Access and SAP without programming; effectively bridging the needs of business users with the governance requirements of IT. The Winshuttle tools transform business processes for both implementation and post production projects, including data import, data quality and data integration. Managing SAP data has never been simpler for the hundreds of Global 2000 companies that rely on Winshuttle. Headquartered in Bothell, Washington, Winshuttle has offices in the United Kingdom, France, and India. For more information visit <http://www.winshuttle.com>, email [info@winshuttle.com](mailto:info@winshuttle.com) or call 1-800-711-9798 in the United States or +800 27 00000 9 in Europe.

### eSHUTTLE Architecture

eSHUTTLE is a Web-based application hosted behind the company firewall. It leverages Microsoft technology, including:

- IIS
- Window Server
- .NET
- MS SharePoint

Installation requirements: Windows 2003 or higher running on a physical or virtual machine (2.5Ghz with 4G of RAM).

Winshuttle supports eSHUTTLE used in conjunction with transactionSHUTTLE and runSHUTTLE versions 8.3 and above. Winshuttle will support querySHUTTLE and xSHUTTLE version 6.2 which will be available in Q4 2009.
