SHUTTLEmaster Certification

This course is for those who administer Winshuttle applications and are central to deploying transactionSHUTTLE, querySHUTTLE and eSHUTTLE across the enterprise through others in the organization.

Objectives:

- 1. Create Deployment Strategies** – Learn the best approaches to deploying transactionSHUTTLE® and querySHUTTLE applications
- 2. Employ transactionSHUTTLE® Technology** – Understand how the transactionSHUTTLE® environment learns transactions and business processes
- 3. Record, Map, Troubleshoot and Run** - Perform the full lifecycle of transactionSHUTTLE® Recordings
- 4. Leverage Winshuttle®** - Use advanced features to make transactionSHUTTLE® and querySHUTTLE more useful
- 5. Raise Effectiveness** - Automate business processes and repetitive tasks
- 6. Maximize the Investment** – See where transactionSHUTTLE® and querySHUTTLE applications can be used across the enterprise
- 7. Manage your deployment** – See how eSHUTTLE can make management and reporting on transactionSHUTTLE usage easier

Content:

- transactionSHUTTLE® setup and deployment
- Publishing to and deploying for runSHUTTLE®
- transactionSHUTTLE® SAP Server Component
