

# Upload/Download SAP data with Excel

6<sup>th</sup> December 2016

Q: Does Foundation replace Studio? If so, can Studio licenses be transferred to Foundation?

A: Foundation does not replace Studio. Studio is the key user product which is used to automate transaction, design queries and build the excel templates and forms for data management. Foundation is the server product for the workflow execution, user governance and server side execution of data to SAP.

Q: Can Winshuttle add long text in the case of PM task lists?

A: Yes, Winshuttle product supports creation, extraction and update of long-text into SAP. A specific Plant Maintenance example can be seen here: <https://www.youtube.com/watch?v=rPIOjDrepqc>

Q: Who owns the process? Business process lead, Continuous improvement?

A: The Winshuttle solutions can be owned and managed by the business users who can reside in various teams (Business transformation, continuous improvement or a functional team like Finance, Operations etc.). Furthermore, you have the peace of mind because it respects all the SAP security and authorization framework and IT can choose to govern it from the technical standpoint.

Q: Does it also support OM transactions or HR master data not only Finance data?

A: Yes, Winshuttle supports all functional areas in SAP ERP including OM (Order Management), HR (Human Resources) but all the others too. <http://www.winshuttle.com/solutions-sap/modules/>

Q: Can SAP APO-DP forecast for a certain Customer-location-code be updated, please?

A: Winshuttle works via the presentation layer of SAP. Hence, it can automate any transaction code or BAPI by mapping it to Excel.

Q: Can Winshuttle be used for Plant Maintenance?

A: Yes. You can find some examples on our website: <http://www.winshuttle.com/solutions-sap/modules/plant-maintenance/>

Q: Can this program create first data registration in SAP from an Excel doc MM01 transaction in SAP?

A: Yes. In addition it can also automate other material master processes in addition to MM01 by daisy-chaining multiple t-codes in a single template.

Examples: <http://www.winshuttle.com/sap-master-data/material-master/>

**Q: How can you use Winshuttle to extract data from SAP?**

A: Winshuttle product suite can extract data from the table level but joining multiple tables and mapping it to an Excel template.
