TOPIC

# Using query to export text that can be edited and loaded back into SAP

# Extract & Upload Texts - Example: Material Texts

## Extract

Table – STXL

Object – MATERIAL

- ID – GRUN – Basic Data Texts
- BEST – Purchase Order Texts
- IVER – Internal Comments

## Upload

Transaction Code – MM02

Mapper with - Add Long Text

No – 72 Char Limit, No recording required

The background features a dark blue and black color scheme with a grid of dashed lines. Overlaid on this are several financial charts: a candlestick chart in the center, a line graph with a blue trend line on the right, and a bar chart with orange bars on the left. The text is centered in the upper half of the image.

The background features a dark blue and black color scheme with a grid of dashed lines. Overlaid on this are several financial data visualizations: a line graph with blue dots and a red line, a bar chart with grey bars, and a candlestick chart with blue and red bars. The overall aesthetic is technical and data-driven.

# Thank you
