Q: Is it possible to use manually defined validations above the standard SAP validation? Can additional Validations be built into the template?

A: Yes

Q: What are the advantages of using the Winshuttle flow process as shown compared to the in-built SAP process flow?

A: Faster to build and it is built using a non-technical interface. Further Winshuttle also provides capabilities to talk to external systems over Web-services.

Q: How can I get and install the add ins? Does Winshuttle need a server or will it be installed with a thin client installation?

A: Winshuttle comes in both flavors. A desktop install which enables Excel to SAP integration. The server install comes with the User Governance, Web-Form and workflow capabilities along with the Excel-to-SAP solution capabilities.

Q: Is there any way to check if a customer is already created in SAP?

A: Yes

Q: Can I use different colours in the forms? How Can I do it?

A: Yes. Easily done in the Winshuttle Composer.

Q: Can the workflow be integrated with Mail (Outlook) and can it monitor inbound email correspondence?

A: The workflow can be approved/rejected from within the Mail (Outlook) clients.

Q: How is Winshuttle connected to SAP?

A: RFC

Q: To check that there are no duplicates, can I validate against text field entries (e.g. TechID field in equipment)?

A: Yes

Q: Is there any address validation on the creation process, like Uniserv?

A: Yes, such services can be used for address validation.
